

SIMCO's CERDAAC® cloud-based service and quality management platform is widely used by leading life science and technology organizations to reduce costs and improve operations. CERDAAC offers two simple and secure options for exporting customer content:

1. **Quarterly Cloud Export** – allows customer to keep their own copy of data and documents.
2. **Nightly System Integration** – enables integration with other customer software systems.

1. Quarterly Cloud Export

While SIMCO performs extensive backups of all CERDAAC customer data, customers can also perform their own backup to ensure compliance with internal or regulatory requirements.

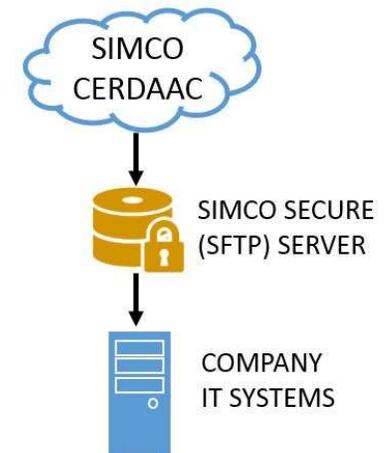

- Provides quarterly export of customer data and documents from CERDAAC to a SIMCO-managed SFTP* server.
- Allows customer to download and archive data and documents, including certificates, electronic forms, attachments, and notes.
- Content can only be accessed via SFTP connection and user's CERDAAC credentials; no additional password required.
- Set-up and training provided via SIMCO professional services.

2. Nightly System Integration

Allows customers to export their CERDAAC data in flexible formats for integration with other systems (e.g. MES, ERP, QMS).

- Enables automated nightly updates to customer software systems with the latest CERDAAC data and documents.
- Nightly updates occur via a 2-step process:
 1. CERDAAC exports to SIMCO's SFTP* server
 2. Customer system imports data & documents from SFTP server
- Allows extensive tailoring of content to be exported, including data fields, electronic forms, attachments, notes, graphs, etc.
- Set-up, coordination, training via SIMCO professional services.

* SFTP stands for Secure File Transfer Protocol
