

# CERDAAC Asset Tracking & Physical Inventory

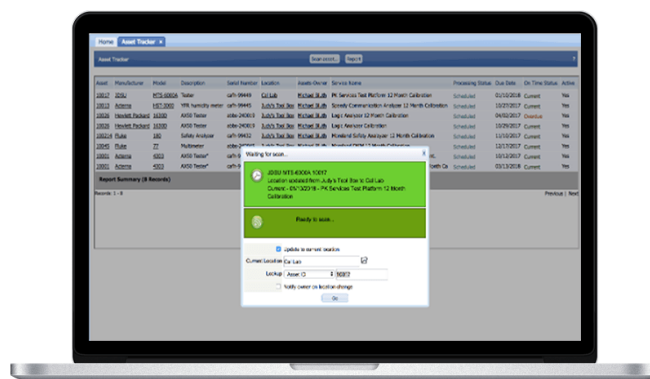

SIMCO's CERDAAC® cloud-based quality execution system is widely used by leading life science and technology organizations to reduce costs and improve operations. CERDAAC provides quality teams with powerful features to track assets and manage inventory.

## Business Challenge

How do you track the continuous movement of assets within your facility, to external vendors, and around your company? How do you efficiently conduct a physical inventory of your assets?

## CERDAAC Asset Tracking Solution

- Reduce asset CapEx expenditure by easily tracking and updating asset location changes.
- Improve asset economic performance by tracking asset downtime and minimizing bottlenecks.
- Reduce cost of completing yearly physical inventory projects by quickly scanning assets to verify asset location, owner, and service status.

Visual verification of asset calibration service status

## FEATURES AND BENEFITS

### Eliminating Lost Assets:

- Large expenses to replace lost equipment can be eliminated by properly tracking the location of your assets.
- Reduce human error and capture asset location and owner changes through label printing and barcode scanning.
- Organize by owner, team, location, model
- Categorize & track shared assets

### Improve Asset Economics:

- Improve asset economic performance by tracking and minimizing downtime during transfer and calibration service.
- Efficiently reassign assets during manufacturing plant reconfigurations through mass location change uploads.
- Track assets in transit or idle by location and service stage to minimize asset downtime.

### Label Printing & Barcode scanning:

- 1D or 2D barcode label printing
- Selectable label size
- Auto-populate text and barcodes on labels
- Compatible with most label printers/scanners

### Efficiently Perform Physical Inventory:

- Save hundreds of man hours by efficiently completing physical inventory of assets assigned to production lines or labs.
- Reduce human error by using barcode scanning and eliminating manual data entry.
- Verify asset location, owner, and service status to ensure asset compliance.
- Visual on-screen verification of service status

### Dashboards & Reports:

- Executive dashboards display real-time program KPIs for decision making
- Extensive pre-built reports to uncover program bottlenecks and streamline operations
- Report builder for personalized analytics
- Automate knowledge dissemination through report scheduling, email, and export.
