CERDAAC Asset Management Solution

SIMCO's CERDAAC® cloud-based service and quality management platform is widely used by leading life science and technology organizations to reduce costs and improve operations. CERDAAC provides manufacturing, quality, and facility teams with powerful features to manage important assets such as gages, instruments, and other key equipment.

BUSINESS CHALLENGE

How do you efficiently manage your critical assets throughout their lifecycle and as they move around your company and supply chain?

ASSET MANAGEMENT SOLUTION

- Provides visibility of all your assets across the enterprise and across your supply chain
- Reduce asset CapEx costs by properly managing assets and tracking asset location
- Improve asset economic performance by minimizing asset downtime and reassigning underutilized assets
- Ensures you always have an up-to-date inventory of your assets, making it quick and easy to conduct a physical inventory
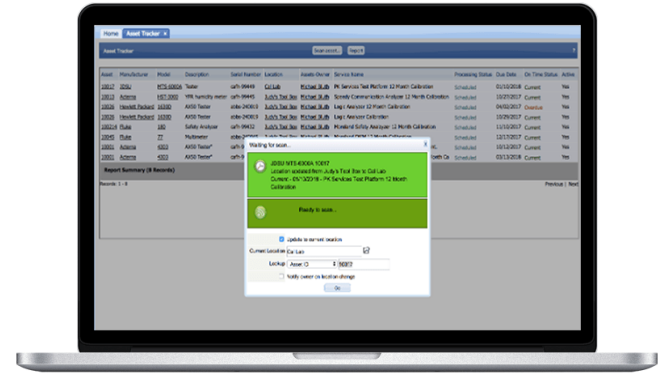

FEATURES & BENEFITS

Asset Database

- Asset information is easily accessible in CERDAAC's database, including location, owner, model, condition, service history, etc.
- CERDAAC also saves historical and inactive asset information to ensure you are always audit-ready
- Track assets in transit or idle by location and service stage to minimize asset downtime

Digital Workflow

- The system creates a digital workflow that makes it easy to manage your assets throughout their lifecycle - from initial enrollment, to ongoing use, to retirement
- CERDAAC eliminates paperwork with easy-to-use, customizable electronic forms
- Forms can be designed to ensure proper asset enrollment, maintenance, retirement, or any change in asset status
- Manages your tool crib & asset check-out and check-in process

Bar Code Scanning & Label Printing

- The asset tracking option allows you to use bar code scanners to quickly identify assets
- Label assets with 1D or 2D barcode label printing with selectable label size

Visual verification of asset calibration service status

Dashboards & Reports

- Executive dashboards display real-time program KPIs
- Library of pre-built reports and Report Builder for personalized analytics

Easy-to-Use Cloud Solution

- CERDAAC is easy to use and users can access from their PC or Windows tablet
- Since CERDAAC is cloud software, you can securely access the system from anywhere
- No additional costs for IT hardware or support
- CERDACC can be integrated with ERP or other systems to share information.
