

CERDAAC SIMCO Manager

Centralized calibration service management for SIMCO customers

CERDAAC SIMCO Manager gives SIMCO customers online access to the information, workflows, and records needed to manage calibration activity across assets, teams, departments, and locations. From upcoming service events to certificates, quotes, reports, and asset history, SIMCO Manager helps teams stay organized, reduce manual follow-up, and maintain audit-ready calibration records.

Improve Visibility

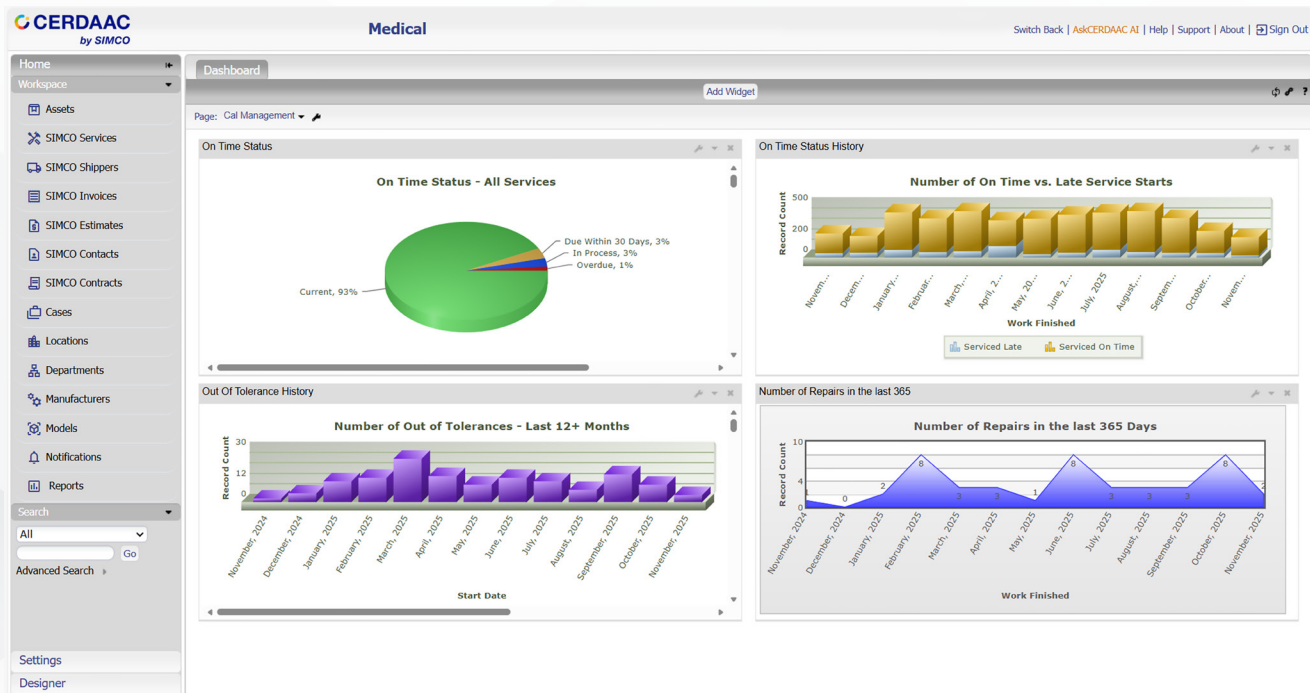

Track asset status, service history, due dates, quotes, certificates, and program activity from one online system.

Reduce Administrative Work

Automate recurring service schedules, notifications, approvals, reporting, and document access.

Support Audit Readiness

Maintain centralized calibration records, audit trails, OOT visibility, and controlled access for approved users.

Key Capabilities

Service Management

- Schedule recurring calibration and repair service events
- View service status and history for any asset
- Review and approve quotes online
- Create shipping documentation for pick-up and delivery
- Access calibration certificates and service documentation

Quality & Compliance Support

- Access digitally signed records
- View audit trails and consolidated audit trail reports
- Track Out of Tolerance events and service conditions
- Configure notifications, alerts, and escalation workflows
- Support controlled access through team- and role-based permissions

Asset & Record Management

- Maintain asset data, owners, locations, service records, and schedules
- Organize assets by owner, team, department, location, model, or site
- Transfer assets across owners, departments or locations
- Use barcode-based asset tracking
- Store asset and service data online

Secure Cloud Access

CERDAAC SIMCO Manager is part of the SIMCO CERDAAC software suite and is included with SIMCO calibration services. The system is fully managed by SIMCO, reducing IT burden while giving approved users access from a web browser.

- Anytime, anywhere browser access
- Unlimited users
- Team- and role-based permissions
- Multi-tiered security
- Managed cloud environment
- Rapid deployment

Reports & Dashboards

- View configurable dashboards for program activity
- Track turnaround time, cost, quotes, invoices, POs, and service performance
- Use standard reports or build personalized reports
- Schedule, email, export, or print reports
- Provide approved users with visibility across sites and departments

Premium Options

For teams with more advanced compliance, workflow, or enterprise program needs, SIMCO offers premium options and CERDAAC upgrade paths.

Compliance Module

- Electronic signatures
- OOT case management
- Chain-of-command alerts and reporting
- Advanced compliance workflows

CERDAAC Expansion

- Manage additional internal or vendor service workflows
- Extend capabilities beyond SIMCO-performed calibration services

Professional Services

- Setup and configuration
- Data migration
- Admin and user training
- Strategy and implementation consulting
